Coffee Comments

Coffee: Utilized production in Hawaii for 2020-2021 totaled 22.7 million pounds (cherry basis), down 15 percent from 2019. Bearing acreage was estimated at 6,800, down 1 percent from the previous year. The average yield was 3,510 pounds per acre, down 442 pounds from the previous year. The value of the crop totaled \$48.4 million, down 11 percent from the previous season, with an average annual price of \$2.13 per pound.

Coffee Berry Borer remains a concern for the industry. For several years, the beetle has been established on Maui, Oahu, and the Hawaii island, and was recently detected on Kauai and Lanai. Another major concern is Coffee Leaf Rust, fungus disease detected in the islands in October 2020. Crop quality was a concern for some growers due to heavy rainfall that affected production in some areas.

Marketing Season

Coffee: October to September

Access to NASS Reports

Access the National publication for this release at:

<https://usda.library.cornell.edu/concern/publications/zs25x846c>

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: www.nass.usda.gov.
- Both state and national and reports are available via a free e-mail subscription. To set-up this free subscription, visit the links below:
